

Environmental Policy of Keitele Group

Keitele Group is committed to the following environmental policy:

Keitele Group serves the construction and wood production industries by supplying kiln dried, rough sawn softwood and further processed wood products both to the domestic and export markets.

Keitele Group develops its wood procurement in a way that ensures that the forest biodiversity is favoured, adverse effects on water systems and groundwater and other valuable habitats are minimized, and the landscape factors are taken into account in the planning of felling in accordance with the forest certification criteria.

Keitele Group aims to develop the production processes to reduce the consumption of raw materials and energy, to minimise emissions and waste and to utilise the side products.

In its operations, Keitele Group strives to reduce the consumption of energy and the environmental impact per volume of sawn timber produced by developing the transport logistics and e.g., increasing round-trip transportation.

Keitele Group communicates the environmental impact of its operations to the authorities, key stakeholders and, where appropriate, to the public. The skills of the employees are maintained to promote environmental protection and to prevent unfavourable environmental effects.
